HEALTH**

About us

MedZig is an innovative platform that connects patients and healthcare providers in the most convenient, easy way. It enables patients to find healthcare professionals, get advice, and schedule an appointment with them online.

Seek Help from Healthcare Providers with Ease

MedZig makes it easier for patients to seek advice and book an appointment with a healthcare provider. It has a user-friendly search feature that allows patients to look up available healthcare providers.

With MedZig, patients can look up local healthcare providers, providing them an opportunity to be seen and treated within their region. The platform has an extensive list of specialists, giving patients more options for their healthcare needs.

Breaking Common Barriers to Healthcare

MedZig makes it easier for patients to seek medical consultation from providers in another region. Its auto translation feature makes it more convenient and less intimidating for patients who are seeking advice and help from healthcare professionals who don't speak their language.

As of now, MedZig is available in the most popular languages: German, English, Arabic, French, Spanish, Russian, Turkish, Serbian and Chinese. It aims to expand further and offer more than fifteen language options.

Safe and Secure Medical Platform

The platform makes it easier to create and share medical profiles securely with healthcare providers without the need for physical presence. With these profiles, patients can review their medical records and treatment history. Patients can also view and share their family's medical history through the family medical tree.

All medical profiles created in MedZig are 100% secure. MedZig strictly complies with the HIPAA Privacy Rule.

What people are saying about us

Digitization will have a lasting effect on health care. 3D applications will find their application as well as wearable's and smartphone apps. For this reason, the University of Hamm-Lippstadt has set up a laboratory for head-mounted displays and mixed-reality spectacles. In this context, we also use GMR products in research and teaching.

Due to the successful cooperation, the high-performance GMR products have firmly established themselves in our university.

We are looking forward to working with GMR in the future.

A Complete Medical Portal

OUR TEAM

is changing the global healthcare landscape!

Medzig is part of the German Medical Science Park - "GMR GmbH", located in Germany and founded in 2013, as a leading company specialized in innovative medical IT solutions and medical media products.

With the help of our scientific specialists and experts and the GMR portfolio, Medzig has been growing as a leading innovative platform with over 1.850.244 healthcare providers from different areas of specialty.

The Medzig team is driven by the value "We Care About Your Health". In Medzig, your

health is our priority and it is our aim to provide you the highest standard of medical services.

We work with grassroots advocacy leaders, who have the ability to influence local and national health agenda and make an impact on the global healthcare sector.

The Medzig team works to meet the needs of our patients, helping them obtain quick medical assistance and provide them with high-quality medical treatment.
